

Activity 2
W220
Lyle Gernert & Hannah Pratt

Activity 1

```
<body>
<p>Day Calculation </p>
<form id="form1" name="form1" method="post" action="birthday.php">
<p>
    <label for="textfield">Enter the day of your birthday </label>
    <input type="text" name="day" id="textfield" />
</p>
<p>
    <label for="textfield2">Enter the month of your birthday in number </label>
    <input type="text" name="month" id="textfield2" />
</p>
<p>
    <label for="textfield3">Enter the year of your birthday in four digits</label>
    <label for="textfield3">Enter the year of your birthday in four digits </label>
    <input type="text" name="year" id="textfield3" />
</p>
<p>Learn how many days you have been living:
    <input type="submit" name="button" id="button" value="Submit" />
</p>
</form>
<p>&nbsp;</p>
<label for="textfield4"></label>
</body>
</html>
```

```
8  <body>
9  <?php
10 $day=$_POST["day"];
11 $month=$_POST["month"];
12 $year=$_POST["year"];
13 $a2=Y*365;
14 $a3= (m-1)*30;
15 $a1=$b2+$b3+$birthday;
16 $b2=$birthday*365;
17 $b3= ($birthmonth-1)*30;
18 $b1= $b2+$b3+$birthday;
19 $sum= $a1-$b1;
20 echo "You have been living for $sum days";
21 ?>
22 </body>
23 </html>
```

You have been living for (2048000000) days

Day Calculation

Enter the day of your birthday

Enter the month of your birthday in number

Enter the year of your birthday in four digits

Learn how many days you have been living:

PHP:

```

Activity 2

Value is now 5.
Value is now -2.
Value is now 7.
Value is now 42.
Value is now 26.
Value is now 28.14.

```

8 <body>
9
10 <?php // opening the document to type in php
11
12 define("PI", "3.14"); // calling PI, 3.14 forever withthe use of the word "PI". Defininf PI as a constant and always equal to 3.14
13 $num = 5.14; // labeling "num" as 5.14
14 settype($num, "integer"); //setting the type of the variable as an integer. setting num to be an integeger so it will now be set to 5.
15 // An integer is a whole number.
16 echo "Value is now $num.<br/>"; //printing out the value of the number and also bolding it. line is saying num, which is 5+7, so it
17 // will show 12.
18
19 $num == 7; //num is assigned to be 7
20 echo "Value is now $num. <br/>"; //printing out the value of the number and also bolding it. now take 12 and now subtract 4 making the
21 new value 8.
22
23 $num == 4; //num is assigned to be 4
24 $num= gettype($num); //getting the type od the varaiable as stated above. figuring out which data type it is and setting it equal to
25
26 $num == 4; //num is assigned to be 4
27 $num= gettype($num); //getting the type od the varaiable as stated above. figuring out which data type it is and setting it equal to
28 integer.
29 $num=strlen($num); // couting the length of the string. it $sum is less than 12, this will make ths statement true, so it is now equal
30 to 7.
31 echo "Value is now $num. <br/>"; //printing out the value of the number and also bolding it
32
33 $num *=6; // is assigning the sum to be 6
34 echo "Value is now $num. <br/>"; //printing out the value of the number and also bolding it. the order of operations, we must fo 6
35 first times 2, ewauling 12, and then subtracting 6, givign us 6 again. the num value is now 6.
36
37 $num=2+($num*2-6)-($num%4); // following the arithmetic order to find the number
38 $num /=3; // taking the number above and assigning it to be 3. we set PI TO EQUAL 3.14 so we add sum(2) +3.14 making it equl to 5.14.
39 echo "Value is now $num. <br/>"; //printing out the value of the number and also bolding it
40
41 $num+=PI; //because the echo sign came after this line it is going to show 5.14 and subtract 1 becuase of the two dashes. making it
42 4.15
43 $num--;//decreasment of the number. because the echo sign came after this line it is going to show 5.14 and subtract 1 becuase of the
44 two dashes. making it 4.15
45 echo "Value is now $num."; //printing out the value of the number and also bolding it
46
47 ?>
48
49 </body>
50 </html>
